

Last Wednesday night race on September 5th (it doesn't count in the standings)

It's a PURSUIT race! Attached are the starting times for all the boats which have raced.

Since the wind has been light lately the last starting boat only has 40 minutes to finish before sundown at 7:21 PM we will have to have a two nautical mile race so the boats can get back to their moorings before dark. The finish line will be extra long as in theory all boats will finish at the same time.

Listen to channel 78 for where the windward mark is and race to it and back to the starting line.
